

Release Notes

November 16, 2022

This deployment may include new features, bug fixes, security enhancements, and data migration related issues. The below list contains all the items that will go to Production on 11.16.2022.

[Business Enhancement] Ability to clear length of need (LON) field on a PA

[Business Enhancement] Update certain reports with dollar signs and decimals on monetary data columns for consistency across all reports

[Future Enhancement] Ability to edit and remove scheduled Analytics

[Future Enhancement] Addition of pagination to the Analytics Scheduler tab

[Operational Enhancement] Adding first and last name of users who create and submit PAs to billing to the Serializers

[Bug Fix] Filters are not showing correct information when previewing the Product Activity report

[Bug Fix] Correcting backend PA location server error

[Bug Fix] "Allow left/right" checkbox is incorrectly showing in the UI when creating a new Global Product in System Maintenance

[Chore] Migrate previously soft-deleted Providers with historical PAs to the new Inactive status

[Chore] Revert drop ship product bug fix
