

Release Notes

January 26, 2023

This deployment may include new features, bug fixes, security enhancements, and data migration related issues. The below list contains all the items that will go to Production on 1/26/2023.

[Business Enhancement] Add the Rental Cycle Days to the PA PDFs

[Business Enhancement] Add the Clinic Billing Address to the top of the PA PDFs if it is populated

[Business Enhancement] Add the ability to see an All Inventory Locations option on the Restock Status tab Inventory Location dropdown selection and default to All Locations

[Business Enhancement] On the Spanish translation of the Patient Acknowledgement modal update the Invalid Email error message wording to Spanish

[Business Enhancement] Add the ability to search for products that don't have an associated HCPCS code on the Product and PA pages

[Business Enhancement] Update the breadcrumb links on the inventory item edit page to route Users to the correct pages

[Analytics Enhancement] The Payment Method Breakdown data on the CSV download should be listed in the same order as the modal view

[Reports] Add a new report called Unit Price Adjustment History so Users can export adjustments made to the Unit Price field on an inventory item

[Reports] Add the ability to Pin the Rental Cycle Summary report

[Operational Enhancement] Add a new flag on the Account edit page in SM to set an account's tier

[Future Functionality] Update code to handle enabling MDM in Demo and Prod environments

[Chore] Upgrade web-console to 3.0

[Chore] Prevent focus specs from getting into main codebase

[Chore] Update Boomi credentials in production

[Bug Fix] Pre-auth warning fields are not being set at every type of PA update

[Bug Fix] PA Status report is timing out if Individual Product Lines is selected

[Bug Fix] Attempting to Pin a report with a Custom Date range is incorrectly presenting an error and not pinning the report

[Bug Fix] Total Cost is not being summed at the bottom of the Inventory Value report

[Bug Fix] Only some scheduled report emails are getting delivered

[Bug Fix] The Analytics Scheduler modal is too wide in portrait mode on an iPad

[Bug Fix] The message icon is presenting as red in a newly enabled MDM account
