Release Notes   February 8, 2023

This deployment may include new features, bug fixes, security enhancements, and data migration related issues. The below list contains all the items that will go to Production on 2/8/2023.

[Business Enhancement] Ability to add a custom number of days in the Length of Need field on the Patient Agreement

[Business Enhancement] Add the length of need field to the Serializer

[Business Enhancement] Add Facility and Automotive to the Payment Method Breakdown Modal

[Business Enhancement] Update all reports that display time to show the user time zone rather than UTC

[Business Enhancement] Add Unit price instead of Cost on the Inventory Value Report

[Business Enhancement] Add Obsolete and Phase Out status for Products on the Inventory List Report

[Business Enhancement] Add an error message when the Clinic Location Default field is left blank when mass uploading users

[Business Enhancement] Ability to create and track new versions of Custom Forms in the Custom Forms Edit page

[Business Enhancement] Ability to default new user location in SM similar to the account level functionality

[Future Enhancement] Ability to add a "Replacement Item" item for an inventory item

[Chore] Do not compile or load any Sprockets-generated JS assets in MotionMD Layouts

[Chore] Remove old Bootstrap 2, Bootstrap 3 code and refactor code tied to the Bootstrap 4 migration

[Chore] Remove chardemo test endpoint from MotionMD

[Bug Fix] Add back HTML from missing partial from bootstrap refactor

[Bug Fix] On all devices, when archiving a PA from the Billing Submission tab the page doesn't always auto-refresh

[Bug Fix] On the Usage page, SKUs are unnecessarily wrapping in the Item # column

[Bug Fix] Request Follow Up button is not showing for Custom Defiance in Prod and Demo until page refresh
