

## Release Notes

March 22, 2023

This deployment may include new features, bug fixes, security enhancements, and data migration related issues. The below list contains all the items that will go to Production on 3/22/2023.

**[Business Enhancement]** Create saved product attributes to add to a new product

**[Business Enhancement]** Ability for External Provider users to receive an email alerting them they have PAs to review

**[Business Enhancement]** On the New Rental Product page update the Product Name search field to be Select2

**[Business Enhancement]** On the Restocks list page with multiple pages, when clicking the back arrow, navigate the user back to the last page, not page 1

**[Business Enhancement]** Add a new For Follow Up reason on the drop down

**[Business Enhancement]** Update Account Settings Edit section Warnings UI to match UI in SM

**[Operational Enhancement]** Add a response endpoint for HiP to call upon OTP completion

**[Future Enhancement]** Restrict which roles can add a Product to Product Swap

**[Future Enhancement]** When a "Replacement Item" is selected in the Vendor Purchase Attribute, add that "Replacement Item" to the new restock

**[Future Enhancement]** Alert a user if an item on the suggested restock is a "Replacement Item"

**[Chore]** Integration chore

**[Chore]** Add a README section that explains the difference between the admin and manage namespaces

**[Chore]** Development Chore

**[Chore]** Fix flaky test

**[Chore]** Firefighter chore

**[Bug Fix]** Product Activity report preview section is not working as expected

**[Bug Fix]** Adding long comments to an item on product show page and expanding the item causes it to move down

**[Bug Fix]** Some cancelled restocks are throwing a 500 error because tracks doesn't have the 'voided' icon and we are looking for it

**[Bug Fix]** When completing an Inventory Count, the Inventory Shrink report is sometimes wrongly displaying the "Previously On-Hand Qty" as 0
