

Release Notes

May 8, 2023

This deployment may include new features, bug fixes, security enhancements, and data migration related issues. The below list contains all the items that will go to Production on 5/8/2023.

[Business Enhancement] Hide the “On Hand + Outstanding” bar of a Replacement Item on a restock
– *Future Enhancement*

[Business Enhancement] Ability for a Direct account to download a blank PA as back-up

[Business Enhancement] Move inactive inventory items to the bottom of the inventory list on the product show page

[Business Enhancement] Update HiP callback receipt for Onetime Payment statuses

[Business Enhancement] Check the first 5 characters of the HCPCS code to decide if the Medicare Prior Auth EW should be displayed

[Business Enhancement] Password expiring email link in Staging is pointing towards production

[Business Enhancement] Hide the Needs Follow Up option under the Clinical dropdown for Inventory Admin users

[Business Enhancement] Add Date Filter titled “Trailing 12 Months” to Reports

[Business Enhancement] When importing uncounted items on an Inventory Count, import that item with an On Hand quantity of 0 rather than 1

[Bug] Transfer History report should not show all items being transferred from the last inventory location added if there are products being transferred from multiple locations

[Bug] The last name is not showing hyphenated under the payment method section on the PA

[Bug] When editing the Vendor Purchase Attribute if there is a Replacement Item added before editing it disappears upon saving VPA

[Spike] Research the ability to autofill checkboxes and radio buttons on Custom Forms
