

Release Notes

May 23, 2023

This deployment may include new features, bug fixes, security enhancements, and data migration related issues. The below list contains all the items that will go to Production on 5/22/2023.

[Business Enhancement] When a restock is created, adjust par levels when a "Replacement Item" is on the restock – *Future Enhancement*

[Business Enhancement] Auto-populate certain fields on a Custom Form

[Business Enhancement] When a Satellite location places an order for products that a warehouse does not have adequate inventory for, the restock should show an error

[Business Enhancement] Add a drop down with a list of accounts the user has access to easily switch to a different account

[Business Enhancement] Allow multiple providers to be linked to a single External Provider user (1 of 2)

[Business Enhancement] If a user has access to 2 and only 2 accounts, show a Quick Switch option on PA New Page to allow user to quickly switch accounts

[Business Enhancement] Prevent the ability to delete a product attribute parent & prevent deactivation of children in use

[Business Enhancement] Add ability to pin a Stock Record Report

[Business Enhancement] Add a new pathway for MotionIQ users

[Business Enhancement] Add logic to determine Workers' Compensation payment method

[Business Enhancement] Add the option to hide "Drop Ship" as a Delivery Method for a product for Direct accounts

[Business Enhancement] Ability to deactivate a Product Attribute child if it is only connected to an "Inactive" inventory item

[Business Enhancement] Show Self Pay cost on the PA Receipt if the product is selected as Self Pay/TOS for Direct accounts

[Business Enhancement] Do not show inactive product attribute options when editing an existing product

[Operational Enhancement] Allow HiP to use the one-time payment callback endpoint by token

[Chore] Honeybadger Chore

[Bug] When a Report does not yield data, don't clear the report dropdown of the report selection

[Bug] Unable to change a DJO account to a Direct in SM

[Bug] On the PA Index Page, when a PA is expanded, if a new Payment Method is imported to a PA that did not previously have a Payment Method, the alert symbol does not go away when a Payment Method is imported

[Bug] On the Protocols page, when you change the Search filter, you lose the pagination

[Bug] TypeError: Can't convert nil into Float on printing a PA receipt when charge is blank
