Release Notes   July 17, 2023

This deployment may include new features, bug fixes, security enhancements, and data migration related issues. The below list contains all the items that will go to Production on 7/17/2023.

[Business Enhancement] Do not show an inactive attribute on an inventory item

[Business Enhancement] Change Card Submitted response and update One Time Payment Callback handler

[Business Enhancement] Eliminate blank space on left side of page on Suggested Protocols page

[Business Enhancement] Product Replacement Feature Release

[Business Enhancement] Remove Inactive Account level inventory items from the stock record report

[Business Enhancement] If location flag "Enable Satellite to Convert to Vendor Order?" is False, do not allow any orders without a stock record to convert to Vendor

[Bug] Clinic and Provider filters are no longer in alphabetical order on PA List Page

[Bug] On the VeriPro Dashboard, when changing the Clinic filter, the "Add Note" button on the Actions drop down does not work

[Bug] PA's with a product that doesn't have a corresponding stock record can be signed by the provider on the batch signing page

[Chore] Dashboard Performance Updates

[Chore] Remove code causing double requests on the VeriPro dashboard

[Chore] Downgrade skylight to 4.x and upgrade bullet to 6.1
