

## Release Notes

December 4, 2023

---

This deployment may include new features, bug fixes, security enhancements, and data migration related issues. The below list contains all the items that will go to Production on 12/04/2023.

**[Business Enhancement]** Update the Help Ticket submission form within the application to add information needed by the Customer Success team to solve tickets in a timelier manner.

**[Business Enhancement]** Update the Help Ticket form to all Users to attach documents to the initial ticket submission.

**[Business Enhancement]** Update the Patient Charge Receipt to include more helpful information.

**[Business Enhancement]** Update patient cards on the All and Recent list patient pages with more helpful information.

**[Business Enhancement]** Update the Noncovered Medicare HCPCS Code Early Warning to check only the first five characters of the HCPCS Code so the EW will trigger on custom HCPCS codes when appropriate.

**[Business Enhancement]** Allow the ability to download reports in XLXS format as well as CSV.

**[Business Enhancement]** Add Restock Notes created timestamp and user when viewing the expanded restock on the Incomplete Restocks tab.

**[Business Enhancement]** For OfficeCare customers, list the two most common billing channels first, then the remainder alphabetically on the Patient Agreement product.

**[Business Enhancement]** Add a new For Follow Up reason labeled 'Insurance Hold.'

**[Operational Enhancement]** Update the System Maintenance Admin dropdown for improved clarity.

**[Operational Enhancement]** Add device tracking to LUD.

**[Bug Fix]** Stock Count column is showing when deleting stock records via Mass Upload.

**[Bug Fix]** After deleting a stock record via Mass Upload when On-hand and Par Level are zero, the deletion isn't showing on the Par Level Adjustment History report.

**[Bug Fix]** Removing an item from a Satellite location to the Warehouse is causing the header to disappear.

**[Bug Fix]** QA is getting a rails error on Stock Par Level and Stock On-hand Adjustment reports.

**[Bug Fix]** Address issues with date range filters on the Inventory Transfer report

**[Chore]** Turn minification of JS assets off in Acceptance.

**[Chore]** Remove remaining Account.current\_id references from models.

**[Chore]** Esbuild failures should also fail in CircleCI.

**[Chore]** Add additional rake task for 'lud:clear.'

**[Chore]** Switch ES transpile version back to ES2015, Safari12.
