

Release Notes

December 18, 2023

This deployment may include new features, bug fixes, security enhancements, and data migration related issues. The below list contains all the items that will go to Production on 12/18/2023.

[Business Enhancement] Update Same or Similar results pill to display Inconclusive when a HCPCS code that is not part of Same or Similar is checked.

[Business Enhancement] When the Contact Email is present on the Inventory Location, then Vendor reply emails should be directed to that email address.

[Business Enhancement] Add the Vendor name to the subject line of emailed POs.

[Business Enhancement] Update ABNs to allow for more specific reasons why an item might not be covered and for patients to apply the signature date to the ABN.

[Reports] Separate the Date and Timestamp columns on a set of reports.

[Operational Enhancement] Add Live Chat Custom Launcher.

[Operation Enhancement] Enable Zendesk Live Chat feature.

[Operational Enhancement] Submit additional fields to Zendesk for Live Chat.

[Operational Enhancement] Add a new V1 API endpoint to update `vpa.unit_price`, including Unit Price Adjustment.

[Operational Enhancement] Add Live User tracking to the Restock pages.

[Future Functionality] Update PA UI, Medical Information section with Actioncable/Turbo.

[Future Functionality] Update PA UI, Patient Demographics.

[Future Functionality] Update PA UI, Diagnosis Cards.

[Future Functionality] Hide new PA UI flag.

[Bug Fix] User is not taken to the correct PA Error filter when clicking Document Generation or Transmission Failed from the Billing tab on the dashboard.

[Bug Fix] XLSX version of the PA Status report is missing Archive details.

[Bug Fix] When rotating the iPad, the signature is not showing immediately under the finger or stylus.

[Bug Fix] When there is a validation error when creating account level Items, address the error so the account level item does not error.

[Bug Fix] PA Status report is not showing every product if there is more than one Billing Channel per PA.

[Bug Fix] Pre-filled fields are not working correctly in Live Chat.

[Chore] Fix flaky spec/features/veripro_dashboard_browser_spec.rb:257.

[Chore] Update `medical_info_controller.js` to adopt new `select2_controller` approach to `select2` in stimulus.
