Release Notes   January 15, 2024

This deployment may include new features, bug fixes, security enhancements, and data migration related issues. The below list contains all the items that will go to Production on 01/15/2024.

[Business Enhancement] Add additional logic to default the Insurance Type to Work Comp on Payment Methods by looking for 'WC' in the name.

[Business Enhancement] On the Restock Check Status modal, highlight the Backorder row so it's easier to identify those items.

[Operational Enhancement] Amazon Linux 2 AMI

[Operation Enhancement] Add a new V1 API endpoint to update sales_price.cost, including sales_price_adjustement history.

[Future Functionality] Update Product Card minus the 'add product' flow.

[Bug Fix] Remove the grey bar that is visible under the nav bar on the main dashboard.

[Bug Fix] Inventory Location name isn't maintaining capitalization.

[Bug Fix] On the PA Status report, the Archive Reason Can't Bill is showing odd characters.

[Bug Fix] System Admins can't add accounts to Account Groups in SM

[Bug Fix] Fix undefined is not an object (evaluating 'this.$el[0'0.getContext')

[Chore] Disable Competitive Bid flags for all accounts.

[Chore] Underscore 1.13.6 Dependabot alert.

[Chore] Update redis related gems and fix related warnings.

[Chore] Create testing for XLSX output from the AXLSX gem.
