

Release Notes

January 29, 2024

This deployment may include new features, bug fixes, security enhancements, and data migration related issues. The below list contains all the items that will go to Production on 01/29/2024.

- [Business Enhancement]** In accounts utilizing Warehouse feature, update suggested restock functionality so any product without a vendor assigned will default to restock from the warehouse.
- [Business Enhancement]** For OfficeCare Users, update the Drop Ship Check Status modal to match the Restock Check Status modal.
- [Operational Enhancement]** Replace the QA environment's notification bars so we don't have to manage multiple UIs.
- [Operational Enhancement]** Add patient 'Age' as a new fillable field for auto-fill CFs.
- [Operational Enhancement]** Keyboard control – 2.4.7 Focus Visible.
- [Reports]** Refine the Same or Similar logic on the PA Status report to show Error and reason if the Same or Similar check shows an Error on the PA.
- [Future Functionality]** Add a new flag on Billers for PEID.
- [Future Functionality]** Add PE to unused patient purge process.
- [Future Functionality]** Add new V1 API endpoint to accept PEIDs.
- [Bug Fix]** Inventory Value report is not applying 'Total Inventory Value Count' filter on the XLSX version.
- [Bug Fix]** Provider Usage report has Product Mix and Total Unit Price data switched on the XLSX version.
- [Bug Fix]** Auto-logout warnings aren't working in the QA environment.
- [Bug Fix]** Batch Signing isn't working on iOS12 iPads.
- [Bug Fix]** In SM, when viewing the Inventory Location in an account, the User cannot scroll down the page.
- [Bug Fix]** In SM, an account cannot be removed from a CF if the account name is too long.
- [Chore]** Remove remaining account.current_id references from models (6/7).
- [Chore]** Fix flaky update_patient_agreements_billing_status_spec.
- [Chore]** Add /gitinfo route to MotionMD.
- [Chore]** Write deploy_branch_and_sha.text as part of the MotionMD deployment.
