Release Notes   April 8, 2024

This deployment may include new features, bug fixes, security enhancements, and data migration related issues. The below list contains all the items that will go to Production on 4/8/24.

[Business Enhancement] Add multi-select check boxes to Clinic filter in the Patient Agreements tabs

[Business Enhancement] Move authorize.net configuration from env variables to billing_channel

[Business Enhancement] Slim down the Year options on the date picker on Reports and Analytics Scheduling

[Business Enhancement] Disable the Resubmit button on Errored Restocks and re-enable when the response is received

[Business Enhancement] In SM on the Customer Reference Lookup page, add Inactive Pill next to any Inactive Inventory Locations

[Business Enhancement] Update 'Edit' on the Actions dropdown on Product Page to say 'Update Stock Record'

[Business Enhancement] Create a Same or Similar Report

[Future Enhancement] Update PA UI – Signature Section

[Future Enhancement] Update PA UI – Import Payors

[Chore] Update docs to clarify how to compile the front-end JS assets with ESBuild

[Chore] Downgrade Redis back to 4.8.0

[Bug Fix] Spaces are not being stripped from before and after patient email on New PA page when creating a New Patient

[Bug Fix] Inventory Location: Settings UI styling issue in System Maintenance

[Bug Fix] UI in Customer Reference Search in SM has different formatting when selecting the magnifying glass vs. enter

[Bug Fix] On iPad Safari adding same inventory locations on Analytics Scheduler removes a different inventory location

[Bug Fix] Partial search on Account Group is returning inaccurate data

[Bug Fix] Scheduled reports are not getting emailed if the date range is a custom range

[Bug Fix] When navigating to a different tab when on the New PA page for a period of time, then navigating back you are redirected to the home Dashboard
