

## Release Notes

September 9, 2024

This deployment may include new features, bug fixes, security enhancements, and data migration related issues. The below list contains all the items that will go to Production on 9/9/24.

**[Business Enhancement]** Update Activated track titles on the User Activity page in SM

**[Business Enhancement]** Hide Live User tracking of Super Admin

**[Business Enhancement]** When “Default EMR/Fax Script” is set to TRUE on the Biller, trigger physician signature on patient signature instead of product creation

**[NPI Database Integration]** Retire medical\_professional\_specialties table from database and remove that information from the UI

**[PA 2.0]** Add New Provider and Change Location menu options

**[PA 2.0]** Create New PA Page

**[PA 2.0]** New PA Create New Patient functionality

**[Bug Fix]** iPad Safari: New stock record par and stock numbers are hidden in low resolution

**[Bug Fix]** Able to spam-click Add Items in PA 2.0 product selection modal

**[Bug Fix]** Filters set on Restock list page are lost and incapacitated when clicking the back arrow to return to the list page after clicking into a restock id

**[Bug Fix]** Drop Ship alert is briefly, intermittently showing “Requirements not met” after request has been submitted

**[Bug Fix]** PA 2.0 – Clicking “Add Selected Items” multiple times causes multiple products to be added

**[Bug Fix]** Viewing the PA page 2.0 does not activate the live user dashboard icon on the PA index page

**[Chore]** Redefine Biller inside migration so development setup works
