

Release Notes

MotionMD Deployment - 11/08/2018

Release Features

This deployment may include new features, bug/defect fixes, security enhancements, and data migration related issues. The below list contains all the items that will go to Production on 11/08/2018.

[Feature] Last two Patient facing and/or Private Notes can be viewed on the expanded Patient Agreement line so user does not have to click into Patient Agreement

[Feature] Patient signature 'Acceptance of Terms' modal update

[Update] Add Availity Payor and Contract ID to JSON messaging

[Update] If user is logged in and goes to /login, redirect to home page

[Bug Fix] Users who have logged in one time in the last three months are incorrectly activated

[Bug Fix] Date drop down on all reports pages isn't updating to date range selected

[Bug Fix] Cash Pay Early Warning should only look at account assigned HCPCS

[Bug Fix] If account is removed from user, but user is active, do not allow that user in that account

[Security] Upgrade to most recent version of imagemagik

[Dev Ops] Migrate from Phantomjs to headless Chrome

[Dev Ops] Update charge receipt generator to include non-self-pay payment methods
