# Release Notes   September 4, 2019

This deployment may include new features, bug fixes, security enhancements, and data migration related issues. The below list contains all the items that will go to Production on 9.04.19.

[Branding] Update MotionMD login page

[Business Enhancement] Add the ability to search for Vendor name along with Restock Order number on the Restocks page

[Business Enhancement] Add new EDI Partner

[Operations Enhancement] Do not allow users to Edit Clinics or Inventory Locations

[Reporting] Add the Users status to the User report (Active, Inactive or Pending)

[Future Functionality] Add a button to be able to SSO into MIQ

[Future Functionality] Add a patient pathway dropdown once MIQ requirements are met so a pathway can be selected

[Future Functionality] Add the ability to view a page of historical usage transactions

[Future Functionality] Add two new indexes so that a specific report runs faster

[SSO] Remove the username and password fields from the user profile page for SSO users

[SSO] Prevent users with an identity provider form logging in with their MotionMD username and password so customers can manage their users

[Bug Fix] Able to input invalid provider when creating a new PA or Usage

[Bug Fix] Disable the Help Ticket Submit Request button after one click

[Bug Fix] Multiple products on a PA breaks the INS pill on small viewports

[Bug Fix] Inventory usage validations

[Tech Debt] Add Coveralls

[Chore] Fix intermittent spec failure: spec/integration/models/report/billing_status_counts_spec.rb

[Chore] Address failing CircleCI builds in all branches

[Chore] Clean up various backend warnings
