Release Notes   February 5, 2020

This deployment may include new features, bug fixes, security enhancements, and data migration related issues. The below list contains all the items that will go to Production on 2.5.20.

[Operational Enhancement] OfficeCare accounts should only be able to decrease the quantity being suggested when creating a new Restock Order

[Operational Enhancement] Improve the error message if an OfficeCare user tries to increase the quantity being suggested when creating a new Restock Order

[Operational Enhancement] After an Inventory Location is set to Inactive, remove any links so users can't create a Restock for an Inactive location or see Inactive Stock Records on Inventory Item page

[Operational Enhancement] Add the PA Archive Reason to export data

[Operational Enhancement] Remove the External Provider role from the New Users page so that role isn't assigned from that page

[Operational Enhancement] Improve Heap reporting for analysis

[Operational Enhancement] Add the ability to SSO with ADFS so we can get additional customers using SSO

[Operational Enhancement] Add Search capabilities on the Account Groups page in System Maintenance

[Operational Enhancement] Add 'Link Self' button accounts page in System Maintenance

[Operational Enhancement] Only allow View Only access on Vendor and Vendor Site list in System Maintenance

[Future Functionality] Users should be able to navigate back to the filtered Counts page after setting filters

[Bug Fix] Restock Preview button is not working. Update the button to say Actions and be a dropdown menu

[Bug Fix] Account ID search isn't working on account change page

[Bug Fix] Decrypt error on Adjustment History report

[Bug Fix] Duplicate HCPCS are only displaying once on Product report

[Bug Fix] At browser resolutions under 100% the dropdown menu divider lines break

[Bug Fix] Number of PAs selected on the Billing Submission tab not updating when a filter is set

[Chore] Move make_request out of before blocks in controller specs

[Chore] Update spces for Rails5 compatability

[Chore] Update Chromdriver to version 80

[Chore] Run a rake task to generate SAML metadata for ADFS
