

Release Notes

May 13, 2020

This deployment may include new features, bug fixes, security enhancements, and data migration related issues. The below list contains all the items that will go to Production on 5.13.20.

[Business Enhancement] Add an Early Warning for missing Date of Injury if Work Comp or Auto Payment Methods are added to the PA. Warning will disappear after DOI is added to the PA

The screenshot shows the PA interface with a warning message. At the top, a yellow bar says "Incomplete" and "4 Requirements for Billing". Below it, a message states: "This patient agreement cannot be submitted for billing for the following reasons: Date of Injury is incomplete. ICD-10 Diagnosis has not been chosen. The patient has not signed. The doctor has not signed (script not faxed or script not attached)". To the right, a red-bordered box contains the message: "Warning Detected: A Date of Injury (DOI) is required for Workers Comp and/or Auto claims. Please remember to add in the Medical Information section of the PA." Below the warning are two sections: "Patient Demographics" and "Medical Information".

[Business Enhancement] Improve the ICD-10 section on the PA to allow multiple codes to be searched and selected before clicking the Add button

The screenshot shows the "Diagnoses" section of the PA interface. It displays two selected ICD-10 codes: "M21.00 x" and "S83.001A x". Below the list is a text input field labeled "Name or Code" and a green "Add Diagnoses" button.

[Operational Enhancement] Allow for Account level notes to be edited or deleted in System Maintenance

[Future Functionality] PA should update after patient signature with stamp for DS

[Future Functionality] Counts list should sort by newest to oldest on the list page

[Future Functionality] Tracks should update with the status of DS

[Bug Fix] (Specific User) printing the PA Package prior to Submitting for Verification should not cause issues with updates to PDF

[Bug Fix] Saving a Biller with a blank sender email saves the sender email as an empty string

[SSO] Address brakeman so we can add additional SSO applications without code change

[Chore] Dependabot upgrade: apipie-rails, byebug, skylight

[Chore] Address intermittent failures April 2020
