

This deployment may include new features, bug fixes, security enhancements, and data migration related issues. The below list contains all the items that will go to Production on 11.24.20.

**[Business Enhancement]** Update the Billing Requirements UI at the top of the PA page

**[Business Enhancement]** Add a View All filter option to the Product list page

**[Business Enhancement]** Update the Clinical Specialist role so they can Service a Rental Product

**[Business Enhancement]** Add a new filter under Additional Filters called Drop Ship (OfficeCare)

**[Business Enhancement]** Add a dropdown with type ahead when users need to Change their Location under the Profile menu

**[Business Enhancement]** Update the Attachment section so the drag and drop area does not cover the 'x' to close out of the attachment selection and minimize the Add Files button area

**[Business Enhancement]** Show Users using DocuSign a more appropriate message when the patient does not have an email address entered in the Demographics section

**[Operational Enhancement]** Remove the Bilateral option for Body Side selection when adding a product to a PA to avoid confusion and billing issues

**[Operational Enhancement]** Users with the role of Admin should not be able to access certain spaces

**[Operational Enhancement]** Add the ability for a User with the Admin role to Add product to a PA after it is locked and in the Billed/Received status (non-OfficeCare accounts)

**[Operational Enhancement]** Users with the role of Admin should not be able to remove a product from a PA after it is locked and in the Billed/Received status in OfficeCare accounts

**[Operational Enhancement]** Update the product show page so product images scale better when viewed on the product page

**[Future Functionality]** Validate the provided Primary Use Zip Code is numeric and correct length

**[Bug Fix]** Multiple VeriPro eligibility requests are being sent unnecessarily before we receive response

**[Bug Fix]** PAs using Attached AOB option are incorrectly showing under the Unsigned by Patient filter

**[Bug Fix]** ABN PDFs are rendering in smaller font sizes than the creation page

**[Bug Fix]** New User mass uploads should error completely if any of the data inputs are not valid so users aren't created with missing information

- [Bug Fix]** PA is not displaying the most recent billing requirements if user navigates away and clicks back button
- [Chore]** Add RentalCycle validations for checked\_out\_at and checked\_out\_by
- [Chore]** Upgrade all the Facilities views to bootstrap4
- [Chore]** User.current\_id and account.current\_id should be cleared before every request so we don't end up with bad data
- [Chore]** Delete specific stock records and mark specific Inventory Items Inactive
- [Chore]** Resolve deprecation warning in RSpec output
- [Chore]** Fork Zymist/declarative\_auththorization#allow\_rails\_5
- [Chore]** Fix Honeybadger error where main dashboard is looking for the old role dashboard that was removed
