Release Notes   December 2, 2024

This deployment may include new features, bug fixes, security enhancements, and data migration related issues. The below list contains all the items that will go to Production on 12/2/24.

[Enhancement] Add Archive Reason hover to the Archived pill

[Enhancement] Add Taxonomy to Provider Report

[Enhancement] Search products by HCPC in System Maintenance

[Enhancement] Add F&A Applicable filter to HCPCS list page in SM

[Enhancement] Update the word "Payer" to "Payor"

[Enhancement] On secondary button, when hovering over button, highlight the button

[PA 2.0] BUG – Using a patient with 100 other Medicare PAs and triggering the Duplicate Medicare EW takes a long time to load

[PA 2.0] On the Create New PA page, on the Create New Patient modal, update the year drop down to start at the year 2024

[PA 2.0] Update the paperclip on the sidebar when Attachment is added rather than upon refresh

[PA 2.0] BUG – When you add a protocol to a PA and save the products you must refresh the page to be able to capture patient and provider signatures

[PA 2.0] Add loading wheel after adding provider and patient signatures

[VeriPro 2.0] Fill in data for Coverage section

[Bug Fix] (Security) – Prevent assigning self to Super Admin via POST injection

[Bug Fix] Dispense Date error message and bad date persist in Medical Information section after canceling form then editing again on PA 1.0

[Bug Fix] PA Already Exists Warning is not visible when creating a new PA from the Patient Agreements link on PA 1.0

[Chore] Remove For Follow Up enum and Needs Follow Up flag if possible
