Release Notes   December 16, 2024

This deployment may include new features, bug fixes, security enhancements, and data migration related issues. The below list contains all the items that will go to Production on 12/16/24.

[Enhancement] Create a New Rake Task – Apply See EMR/PM to a batch of Incomplete PAs

[Enhancement] Update the Body Side Discrepancy Early Warning to check the long name of the HCPCS code rather than short name

[Enhancement] In SM on the Add Account to User modal, show the Inactive pill next to inactive accounts in search results

[Operational Enhancement] Let PAGE QA in SM add products to a PA

[PA 2.0] BUG – On Payment Method box with VP enabled, Pay Now button is not disabled even though it is grayed out

[PA 2.0] BUG – When adding a protocol to a PA, multiple Patient Agreements are created

[PA 2.0] BUG – UI fixes when tabbing through the Pay Now modal

[PA 2.0] New Payment Method Modal updates

[VeriPro 2.0] Fill in data for Edit Coverages modal 2/2

[VeriPro 2.0] Fill in data for Edit Coverages modal 1/2

[VeriPro 2.0] Add functionality to the "View Manual Coverages Information" button and create static design for modal

[Bug Fix] Partial Check In filter on Incomplete Restocks tab in an Inv Loc isn't calculating pill data correctly

[Bug Fix] When I use a dropship address, I still have to refresh the page to see the status update to sent

[Bug Fix] Refreshing the Analytics page after applying filters causes datepicker to break

[Chore] Address some flaky tests Dec 2024

[Chore] Change to soft deletion for RoleAssignment table and add Paper Trail
