

JUMP BALL CODE HCPCS EARLY WARNING

A new Early Warning has been enabled in all OfficeCare accounts called Jump Ball HCPCS Code Early Warning. This Early Warning is designed to show a warning on the Patient Agreement if a product with one of the designated Jump Ball HCPCS codes has been added to the PA: L0627, L0642, L1832, L1833, L3760, L3761 and has a Billing Channel of Specialty Bracing (IB Channel). RCM is requiring that any PA with a Jump Ball HCPCS code and the product was dispensed at the time of service to be routed to OfficeCare. PAs with a Jump Ball HCPCS code and the product was not dispensed at the time of service should continue to be routed through the Specialty Bracing Billing Channel (IB Channel). The warning will include a button allowing Users to quickly update the product to the OfficeCare billing channel if the product was dispensed.

Specific workflows and actions are outlined below.

The OC account has stocked Jump Ball Code products:

If an OfficeCare account has stock of the Jump Ball HCPCS products, validate that Stock Records are created with the correct On-hand and Par Levels. If not, submit a Help Ticket letting the Customer Success Team know what Inventory Location to add along with On-hand counts.

The stock records will ensure all Jump Ball code products dispensed at the time of service get restocked through the standard OfficeCare process.

Product is set to fulfill from Drop Ship with Specialty Bracing Billing Channel and the Patient has not signed the PA:

The screenshot shows the 'Products' section of the OfficeCare interface. A product, 'X-Act ROM Knee Brace', is displayed with its details. A red box highlights the 'Drop Ship to Clinic Address' field, which is marked 'Not Fulfilled' and shows the address '1430 Decision St, Vista, CA 92081'. Another red box highlights the 'Billing Channel' field, which is set to 'Specialty Bracing'. A green box highlights a 'Warning Detected' pop-up window. The warning message states: 'If this product was dispensed to the patient, click the button below to update the billing channel to submit the PA to OfficeCare.' Below the message is a button labeled 'Switch to OfficeCare'. The product details include: (11-2151-9 / DIO - Donjoy), Category: OTS Splinting, Side: Left, HCPCS: L1833, Self Pay Price: \$0.00, Billed Charge: \$0.00, and Self Pay/TOS: No. At the bottom are buttons for 'Exchange Options', 'Edit', and 'Remove'.

In this scenario, if **YES**, the product was dispensed, click the Switch to OfficeCare button in the warning the Fulfill From will update to Stock and the Billing Channel will update to OfficeCare. The Product will be decremented from Inventory when the patient signs the PA.

This is a close-up of the 'Warning Detected' pop-up window. It contains the same warning message as the previous screenshot: 'If this product was dispensed to the patient, click the button below to update the billing channel to submit the PA to OfficeCare.' Below the message is a button labeled 'Switch to OfficeCare'. A hand cursor is shown clicking the button.

In this scenario, if **NO**, the product was not dispensed, do not click the Switch to OfficeCare button. Add a Billing Note that the product was Not Dispensed and upon submission, the PA will be routed to the IB Channel and handled like all standard IB orders.
