Release Notes   April 7, 2025

This deployment may include new features, bug fixes, security enhancements, and data migration related issues. The below list contains all the items that will go to Production on 4/7/25.

[Enhancement] Add a Set New Pars to On hand Counts button when uploading Inventory Counts

[Enhancement] Add default copy of PO email address value in account settings

[Enhancement] Add option on Biller for enabling "Clinic Employee" selection on Patient Relationship

[Enhancement] Create new Report titled "Follow Up Status" Report

[Enhancement] Add "Electronically Signed and Dated" statement below signature and date section on Completed ABN

[Enhancement] Add a new Analytics chart on the Overview tab on Analytics showing Net Income by Provider Classification

[Enhancement] Add two new Date fields to the Medical Information section

[Enhancement] Add Policy # and Group # to the PA Status Report

[PA 2.0] BUG – Product images shapes should be consistent and not cover product name on PA 2.0

[PA 2.0] BUG – file size is displaying as bytes, should be KB

[PA 2.0] On Pay Now modal on PA 2.0 remove increase/decrease option on Card Number and CVV fields and add "*" detail to Card Type field

[PA 2.0] Add "Create New Provider" option on Create New PA page

[PA 2.0] BUG – Entering a CC payment with an empty CVV does not cause an error

[VeriPro 2.0] Make a few UI updates on the VeriPro Coverages page

[VeriPro 2.0] Update View/Edit Coverages – invalid field defaults

[VeriPro 2.0] Add tooltips to abbreviated titles on VeriPro Coverages page

[Bug Fix] On the Inventory Counts module, when adding a product that has an existing stock record, the par level column gets really big

[Bug Fix] Inventory Location name field overlaps with Inventory Count text

[Bug Fix] On a manually created payor the Insured's Birthday is off on the Patient Record page

[Bug Fix] If a Stock Record is deleted and a user adds that product on a PA, the Provider is still able to sign with Stock Record Missing/Product Not Fulfilled

[Bug Fix] Adding 2 products then using Exchange Options changes the order of the products if user refreshes the page

[Chore] Stop relying on asset from Wikimedia.org in the tests

[Chore] Create new DB base dump for development

[Chore] Fire common JQuery events as native events for Stimulus controllers

[Chore] Remove billing_channel_id from generated_documents table

[Chore] Switch ConsignReplenishRequest from Boomi to OIC

[Chore] Upgrade to ruby-saml to fix 2 critical and 1 high security vulnerabilities
