Release Notes   December 21, 2021

This deployment may include new features, bug fixes, security enhancements, and data migration related issues. The below list contains all the items that will go to Production on 12.21.21.

[Business Enhancement] On the User list page, update the Actions button to Edit to make it faster to edit a User's profile

[Business Enhancement] Update the Exchange Options modal text so it's more clear what action Users need to take when a product size/side is exchanged

[Business Enhancement] For Direct Customers, add the ability to include information relevant to the injury date on a PA for billing purposes

[Business Enhancement] On the Inventory Location Stock by Item and Incomplete Restocks tabs, add a page and total quantity so it's easier to tell how many items or restocks

[Operational Enhancement] As a SA, I would like to see the User Login details on the User page in SM

[Future Functionality] ANCHE, add new VP tab and EPR by VP payor table

[Future Functionality] PAM, add ability to received webhooks for EPR

[Future Functionality] MDM, add the ability to mark conversations as resolved

[Bug Fix] Users are unable to add products to PAs if the PA is created utilizing Protocols

[Bug Fix] Admin Users are unable to reactivate Inactive Users from the User Edit page in accounts

[Bug Fix] PAM SSO not utilizing the correct URL

[Bug Fix] Adding stocking units on the Vendor Purchase Attribute modal causes the UOM to disappear

[Bug Fix] Downloading anything on the Analytics tab enlarges the charts and tables

[Bug Fix] In SM, Users are not alphabetized when searching by last name

[Bug Fix] On User list page, the Deactivate/Activate Selected Users button doesn't work

[Chore] Remove Account.current_id references from the Clinic model
