

Release Notes

October 20, 2025

This deployment may include new features, bug fixes, security enhancements, and data migration related issues. The list below contains all the items that will go to Production on 10/20/25.

[Enhancement] Allow Mass Stock Record Deleting in SM for multiple Accounts at once

[Enhancement] Do not create users in Mass Entry if the SSO Identity Provider is Inactive

[Enhancement] Resubmit Failed button on the Mass Entry failed rows page so all the errors I have fixed will be resubmitted at the same time

[Enhancement] Allow mass upload of Replacement Items in SM for multiple Accounts at once via Vendor Purchase Attributes Batch

[Dark Mode] Light Mode Theme

[Dark Mode] Dark Mode Theme

[Bug Fix] Billing Docs are incorrect when there is more than 1 billing channel on the PA

[Bug Fix] Drop Ship Orders are duplicated when a product is placed on a PA that does not have a stock record

[Bug Fix] On Executive Analytics the Total Bill Charge should not change when the Average Collection rate filter is applied

[Chore] Refactor 5 Feature tests into View tests

[Chore] Point Gemfile at EnovisHCS/sftp_server instead of DJO Global/sftp_server

[Chore] Earlywocalypse 1/2- Implement Standard Early Warnings Query DB query class

[Chore] Earlywocalypse 2/2- Refactor non-custom Early Warning Systems to Use Standard Early Warnings Query

[Chore] Add documentation around Turbo/Stimulus modals

[Chore] Update replica configuration to end production deploy lottery

[Chore] Refine documentation for creating new Reports

[Chore] Do not connect to third party services on the Internet when running the test suite
